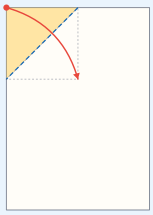
How to fold the Jet

11 folds · a little fiddly · one sheet of A4

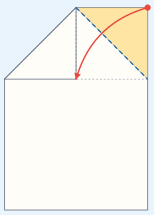
Our own: the classic dart with its keel slanted, so the wings sweep back from a slim nose, and its wingtips folded up into two fins. Fins at the back keep a plane pointing the way it flies, as feathers keep an arrow straight.

1



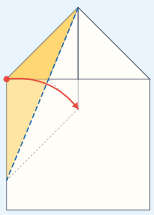
Fold the top left corner to the middle.

2



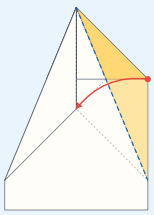
And the other one.

3



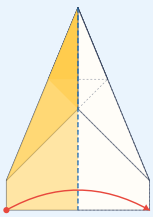
Fold the new edge to the middle.

4



And the other one.

5

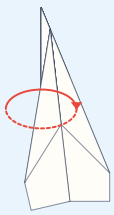


Fold it in half along the middle.

6

Fold the wing down, along the keel.

7

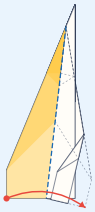


Turn it over.

8

Fold the wing tip up along the line: a fin.

9



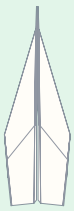
And fold the other wing to match.

10

Turn it over again.

11

And the other tip, to match.



Open the wings out, level with the keel, and throw it gently, straight ahead.

Crease it sharp. Line the edges up exactly, then run a fingernail along each fold.

If it dives, bend the back edges of the wings up a little.

If the nose rises, then drops, it's stalling: bend the back edges down a little.
